Project #3020114 (I own the property to south of the the project)

I would like to respectfully request that no demolition permit be issued until after the EPA site review & visit that will occur on February 22, 2017. We the adjacent property owners are concerned that the extent of the testing done on the site for contamination was inadequate.

Please provide information about the timeline for the demolition permit.

Thank you very much,
Laura Parris Reymore
